Expertise-On-Demand Service Contract

The EOD Contract provides you with the flexibility to pick and choose the help you need and deliverables you consume based upon the demands of your individual business requirements. Built in response to customer feedback, this agreement brings together Gradian Pre-Sales, Professional Services, and Support into a single contract.

A true advocate of our business purpose, EOD pairs effectively with any Gradian-accredited solutions to complement and accelerate your existing cyber security operations and workflows. The contract provides you with a support and services safety net built to meet the dynamic demands of your business and puts you in control of how your money is spent.

Top Use Cases

Strategic Guidance - Keep pace with how to use the tools you own to mitigate risks to your data posed by the changing threat landscape

Support Escalations – Gain the flexible reassurance of having Gradian on standby should you need immediate access to premium support engineers

Expertise Alignment - Provides you with immediate access to highly accredited solution engineers whenever you need them

Solution Upgrades - Ongoing config optimisation and application upgrades enable you to continually evolve your security posture

Policy Management - Leverage deep policy expertise to better understand incident trends

Key Benefits

Can be used across any Gradian supported Endpoint, Mail, Web and DLP technology

You're in control of how and when you spend your money

Tailored to your specific growth plan

Reduces financial costs associated with hiring, training and retention

EOD contracts give you access to the UK-based expertise you need as and when you need it through a flexible consumption model that scales up and down as business conditions change.

Why expend budget hiring a single expert for one role when you have ad hoc access to a set of solution specialists with an intimate knowledge of the tools you have? Re-think your approach to acquiring cyber security expertise with EOD.

Start small. Let us prove our worth. Top up as you go.
